

GHANA GRID COMPANY LTD

PRESS RELEASE

ELECTRICITY SUPPLY INTERRUPTION

Tuesday, November 20, 2018: Ghana Grid Company Limited (GRIDCo) wishes to inform the general public of power supply challenges experienced yesterday November 19, 2018 during the peak periods between 7pm and 9pm.

This was as a result of sudden drop in gas pressure at Aboadze which caused a reduction in power generation from the West. GRIDCo had to call on other thermal plants in Tema to restore full power supply.

GRIDCo assures the general public that there is enough generation to meet power demand. We are working with all power generators to ensure continuous supply to all customers and will keep the public informed of further developments.

We deeply regret any inconvenience caused. GRIDCo thanks you for your patience and cooperation.
