

## **KPONE POWER PROJECT**

### **161kV TRANSMISSION LINE PROJECT AND SUBSTATION**

The Ghana Grid Company Limited (GRIDCo) is procuring a corporate loan from the International Finance Corporation (IFC) to support development of an electrical substation, construction of some 1.5 km of high voltage transmission line and upgrade of 10 km of existing transmission lines.

The IFC has since appraised the project. The appraisal considered Environmental and Social Management Plans (ESMP) for the Project and gaps between these plans and IFC requirements. Through implementation of these management plans and the Environmental and Social Action Plan (ESAP), the project is expected to be designed and operated in accordance with Performance Standards.

The Summary of Investment Information (SII) and Environmental and Social Review Summary (ESRS) for GRIDCo have since been reviewed and approved by the IFC. Copies of the document and companion ESAP, the EIA documentation and Environmental Permit are available at GRIDCo's head office located in Tema as per the contact details below and the information has been posted on the World Bank Infoshop.

Any person(s) having an interest, concern, or special knowledge relating to potential environmental and social effects of the proposed project may contact or submit such concerns, etc. to:
